Grand total,	\$53,018.16	\$51,736.70	\$47,974.40

It may surprise some voters to find that the number of pupils in our schools has increased very rapidly during the last two years. The following gives the numbers of all our pupils during the years ending in June of the following years:

1927	1928	1929	1930	1931	1932	1933	1934
579	582	587	576	570	578	622	643

Thus it may be seen that we now have 65 more pupils than we had two years ago and more than we have ever had before.

A few years ago, when the new wing was added to the High School building, we thought that we had more rooms than our schools would need for a long time. We are fast reaching the time when our enrollment is overflowing our present capacity. At the Elementary building we have ten rooms. Two of these rooms are required for first grade pupils and two more for second grade pupils. This uses up all of the rooms on the first floor and leaves six rooms for grades 3, 4, 5 and 6. At the present time the membership in those grades is as follows: Grade 3, 60 pupils; grade 4, 52 pupils; grade 5, 75 pupils; and grade 6, 42 pupils. Except in the case of grade 6, it is impossible to seat any of these grades in one room. In every other grade there are enough pupils to require two rooms for each grade. In other words, we are short one room at the Elementary building this year. Next year conditions will be much worse as we are ending only 42 to the high school building and transferring 57 from grade two to grade three.

At the High School building we are using every available classroom practically every period in the day. If, and when, our school population increases a very little more, it will be necessary to move a part of the sixth grade from the Elementary building to the High School building. This will necessitate the use of at least two more rooms at the High School building.

Fortunately, we have three more rooms at the High School building which are ready for use except for the inside finish and furniture. Since it seems very probable that these rooms must be finished soon, it seems to your committee as though it may be worth while to attempt to get some Federal Aid for doing this work, through the C. W. A. The State Board of Education

has expressed the opinion that, if the School District will furnish the material, the Federal Government will pay for the labor. We have, therefore, made application to the Government to have this work done at once. The total cost will be about \$2,000, and the cost of material will be approximately half of this amount. If we can get these rooms finished at an expense to the school district of \$1,000 and, at the same time, give our laborers an extra \$1,000 worth of work, it seems like an opportunity which should not be passed up. Probably the result of our application will be known by the time this report is printed.

The figures, given above, show that the cost of running our schools during the present year (1933-34) is somewhat less than it has been during previous years.

In accordance with the sentiment expressed at the School Meeting, last March, every salary was reduced where reductions were at all reasonable and profitable to the School District. As was explained last year, our State Aid law is such that a reduction in the salaries of some of our Elementary teachers would save something for the State but nothing for the Northumberland School District. In such cases the teachers, in order to do their part, have volunteered to give a percentage of their salaries to some form of charity in town. While the money so donated by the teachers cannot reduce our school expenses it does help out in providing for the needs of some of the unfortunate members of our community.

The amount of money paid out for repairs last summer was much smaller than usual. This was due to the fact that several items (among them the painting of the High School building) which would have been done in ordinary years was left undone.

At the Elementary building we have had one less teacher this year than during the last ten years. Mrs. Moore resigned in June and Mrs. Merriam was made a teacher instead of a supervising principal.

While we are getting by this year, and may be able to do so another year, the work which Mrs. Merriam did as a supervising principal is being greatly missed. At the present time she is teaching all of the time, and cannot possibly spend time assisting the other teachers with their teaching problems. Fortunately, our teachers during the present year have all had experience and have needed less help than beginners. If and when we employ inexperienced teachers again, we shall again need the services of a supervising principal.

Last year our appropriation was \$35,500, a reduction of \$4,500 from that of the previous year and \$10,200 less than the appropriation of 1932. This was partly made possible because we had a cash balance at the beginning of the year of \$4,291.91. At the end of the present year our cash balance, if we finish the rooms at the High School building, will be approximately \$1,000. It

will be absolutely impossible, therefore, to run our schools next year for the amount appropriated last year.

A detailed estimate of our needs will be presented at the school meeting. The amount to be asked for will probably be about \$39,000.
